

MAKE A DIFFERENCE

HELP INCREASE GLOBAL FOOD PRODUCTION

TAKE MATH 799 MATHEMATICS OF CROP PRODUCTION

Fall 2019 (section G)

It is predicated that by 2050 there will be a global food crisis. In this class we will be working to create crop production models that will help to solve this problem.

We are looking for undergraduate and graduate students from all majors that want to impact the future with a unique opportunity to developing new tools for Crop models

BUILD YOUR QUANTITATIVE SKILLS

Python will be taught and used for modeling (**No Python experience required**)

Work as a team on Polynomials, Statistics, Differential Equations and Linear Programming

Meeting times will be by appointment
